

SEALED SAMPLE

A sample shall be treated to be “**sealed**” if it is received in the laboratory meeting the following requirements;

- All sealed samples should be properly wrapped, gala-sealed and signed by the person having signature in the forwarding letter (Signature must be original with **blue ink**, photocopy would not be allowed).
- Sample shall be packed/wrapped with cloth or paper in a manner so that contents of the pack cannot be removed/altere without tearing the seal and signature.

Samples not meeting these requirements shall be considered to be “**Unsealed**”.
