

LABORATORY SAFETY MANUAL

Chemistry Laboratory

**BANGLADESH UNIVERSITY OF
ENGINEERING
AND TECHNOLOGY**

Published by:

Department of Civil Engineering
Bangladesh University of Engineering and Technology

Editorial Committee :

Prof. Dr. Ishtiaque Ahmed (Convener)

Prof. Dr. A. B. M. Badruzzaman

Prof. Dr. Sarwar Jahan Md. Yasin

Prof. Dr. Tahsin Reza Hossain

Prof. Dr. A.F.M. Saiful Amin

Prof. Dr. Mohammad Shariful Islam

Dr. Tanvir Ahmed

Dr. M. Neaz Murshed

Dr. Sheikh Mokhlesur Rahman (Member Secretary)

Naqib Mashrur (RA)

Ranjan Roy Bappy (RA)

Tasnuva Tanin Meem (RA)

Disclaimer:

The safety measures mention in this manual are applicable for general activities in the laboratory. Students and lab stuffs are asked to follow additional safety measures if it's necessary for any specific experiment.

Table of Contents

1. Emergency.....	4
1.1 What is an Emergency? (Definitions).....	4
1.2 What to do in Case of an Emergency?	5
1.3 FIRE EXTINGUISHER INSTRUCTIONS (PASS)	6
1.4 What if you or people are trapped in a burning building?	7
2. General Conduct	7
2.1 Behavior in the Laboratories:.....	7
2.2 Housekeeping.....	7
3. Working with Chemicals	7
3.1 What to Do if Your Body has Gotten in Contact With a Chemical?	8
3.2 Chemical Storage	8
3.3 Chemical Labeling	8
3.4 Definition of Chemical Waste	8
4. Physical safety symbols.....	9
5. Reference	13

Safety manual

This safety manual is applicable for Chemistry Laboratory. This will help both students and laboratory instructors to know about the safety features and safe work practices inside the laboratory.

1. Emergency

1.1 What is an Emergency? (Definitions)

Sudden, unexpected, or impending situation that may cause injury, loss of life, damage to the property, and/or interference with the normal activities of a person or group and which, therefore, requires immediate attention and remedial action.

Following situations may be regarded as emergency:

- 1) A sudden, urgent, usually unexpected occurrence or occasion requiring immediate action
- 2) A state, especially of need for help or relief, created by some unexpected event

Emergency Contact List

Designation	Phone No.	BUET Office
BUET telephone operator(PABX)	55167100	0

Medical Centre:

Emergency ambulance service/Medical officer	6666
---	------

Designation	Name	Phone No.	BUET Office
Chief Medical officer	Dr. Md. A. K.Masud	01916740809	7344
Senior medical officer	Dr. Mohammad Mashuk Elahi	01552416578	7393
Medical officers	Dr. Md. Hasib iskandar	01720960997	7893
Medical officers	Dr. Md. Mubashwirul islam	01679222750	7817

Fire service and civil defense:

Fire Brigade Emergency/Enquiry	199
--------------------------------	-----

Place	Mobile	Phone
Polashi	01716354370	02-8628688
Mirpur Road	01730002229	02-9001055
Mohammadpur	01712970093	02-9112078

Police & Security:

Emergency Call	999
DMP Police Emergency	01713398311,9551188

Directorate of Students' Welfare (DSW):

Designation	Name	Phone No.	BUET Office
DSW	Dr. Md. Mizanur Rahman	01911346993	6135,7143
Assistant DSW	Dr. Md. Raquibul Hossain	01819557960	7224
Associate Directors	Dr. Mohammad Faisal	01794692601, 01926714764	7713, 6168

Residential Halls: (Updated at 03/08/2019)

Hall Name	Designation	Name	Phone No.	BUET Office
Ahsan Ullah Hall	Assistant Provosts	Dr. Md. Iqbal Hossain	01927885215	7430
Kazi Nazrul islam Hall	Assistant Provosts	Dr. Mahbub Hasan	01820291811	7833
Titumir Hall	Assistant Provosts	Dr. Md. Muktadir Billah	01840702279	7718
Sher-e-Bangla Hall	Assistant Provosts	Dr. Md. Shahinoor islam	01922544639	7933
Suhrawardy Hall	Assistant Provosts	Dr. Mohammad Khurshed Alam	01712526059	6390
Shahid Smrity Hall	Assistant Provosts	Dr. Rupak Mutsuddy	01839848062	7224
Chattri Hall	Assistant Provosts	Nishat Sultana	01757786310	7735
Dr.M.A.Rashid Hall	Assistant Provosts	Dr. Md. Shafiul Azam	01535495622	7470

University security & others:

Designation	BUET Office
Security Emergency Call	7777
Security officer	7482

Palashi R/A Gate	7692
Azad R/A Gate	7760
71,72 No. Building Gate	6330

1.2 What to do in Case of an Emergency?***In the event of an emergency,***

- Get out of immediate danger!
- Report situation to the instructor
- Explain the nature of the emergency.
- Provide your name and location.
- Provide the phone number from which you are calling.
- Answer all questions and do not hang up the phone until the operator is finished.

If the emergency has cause injury to a person,

- Provided it is safe for you, stay with the victim!
- If the victim is conscious, ask what the problem is.
- If the victim is unconscious, check for breathing and bleeding. Do not move the individual until trained personnel arrive or an immediate threat to life exists. Only trained individuals should administer first aid and CPR.
- Keep the victim still, comfortable, and ventilated.
- Protect the victim from any disturbances.
- Search for any emergency identification (i.e. ID)
- Wait for emergency help to arrive. Never leave the victim alone if possible.
- Once the emergency responders have arrived, stay out of the way of emergency personnel and emergency vehicles!

What to do in case of a fire or smoke?

All situations related to fire should be taken seriously. If you hear or see anything uncertain, evacuate the building!

If fire or smoke is discovered anywhere on or about the campus:

- Leave the area where the fire is located, isolating it as well as possible by closing doors and windows around it.
- Activate the fire alarm switch.
- Do not attempt to retrieve valuables.
- Do not use Elevators /lifts .
- Never attempt to fight a fire larger than wastebasket size. Even a small fire can generate enough smoke to cause serious injury. Never attempt to fight a fire by yourself. Call for help. Always stay between the fire and the exit.

If you can't evacuate:

- Find a safe location and call emergency.
- Crawl to the door on hands and knees, so you can breathe the fresher air near the floor.
- Seal your room against entering smoke.
- If it's still smoky in your room, breathe through a wet towel that covers your nose and mouth. Breathe only through your nose.
- Clear flammable debris from the window.

1.3 FIRE EXTINGUISHER INSTRUCTIONS (PASS)

- P * PULL** safety pin from the handle
- A * AIM** at the base of the fire
- S * SQUEEZE** the trigger handle
- S * SWEEP** foam side to side

1.4 What if you or people are trapped in a burning building?

- The universal sign for a person trapped in a burning building is to hang clothing or a sheet out of the window of the room where you are trapped. The firefighters then will know where you are trapped.
- If you are aware that someone is trapped in a burning structure, inform the firefighters immediately.
- Do not re-enter the building alone.
- If you are trapped, stay low to the ground as you try to exit. Do not open any doors that feel hot. Use wet towels or clothes to protect you from flames and smoke.
- If your clothes catch fire, STOP, DROP, AND ROLL!!!

2. General Conduct

2.1 Behavior in the Laboratories:

- Act in a professional manner at all times.
- Visitors must be escorted.
- Contact information is to be posted on all laboratory doors. If an experiment is being run unattended, the experiment contact information must be displayed.
- Students must be aware of the location and proper operation of laboratory safety equipment, i.e. fire extinguishers, flammable cabinets and fume hoods, eye-wash stations, and personal protective equipment.

2.2 Housekeeping

- Lab areas are to be kept clean and uncluttered. This will help prevent spillage, breakage, personal injuries and unnecessary contact with chemicals.
- Contaminated glassware should be cleaned daily.
- Small spills shall be cleaned up immediately from work areas and floors. (Contact Safety & Risk Management for large hazardous spills.)
- Doorways and walkways within the lab shall not be blocked or used for storage.
- Access to exits, hallways, emergency equipment, and utility controls shall remain accessible at all times.
- All tools and equipment shall be returned to their proper storage location after use.
- Chemical containers shall be properly emptied and cleaned prior to disposal. Glass bottles will be uncapped, washed out with an appropriate solvent, triple rinsed with water and placed in the glass container for disposal.
- All non-empty, non-cleaned containers must be labeled with a description of their content!

3. Working with Chemicals

Before working with chemicals, read the MSDS sheet in order to make yourself familiar with the nature of the chemical, its hazard level and emergency response recommendations.

3.1 What to Do if Your Body has Gotten in Contact With a Chemical?

- If you are not sure how dangerous the chemical contact is, tell the laboratory supervisor, course instructor or teaching assistant
- The treatment of a chemical exposure takes precedent over spill cleanup, spill containment, or property damage including water damage from the use of an eyewash or safety shower.
- In the event of chemical contact with skin or eye, flush the affected area for a minimum of 15 minutes using the eyewash station or sink in your lab. If possible, obtain assistance to remove contaminated clothing after flushing has begun.
- If contact is made through inhalation, immediately move to an area away from the exposure.
- After immediate treatment for the exposure has been completed, pay a visit to the doctor.

3.2 Chemical Storage

Proper chemical storage requires that chemicals are stored to meet the following criteria:

- Chemicals are stored only with other chemicals they are compatible with.
- Some chemicals must be stored in special cabinets that provide proper ventilation or flammability protection.
- Some chemical require storage at certain heights.
- Chemicals are best stored in their original containers.
- Some liquid chemicals must be stored with appropriate secondary containers.
- Never store any chemical in a container that is incompatible or does not properly label its actual content.

In order to ensure proper chemical storage, return chemicals to their original place of storage at the end of the lab session.

3.3 Chemical Labeling

An unlabeled chemical can create substantial problems due to uncertainty about how to safely handle, store or dispose of it.

Therefore, all chemicals, including those stored in temporary storage or process containers, must be properly labeled. Never use any chemical or substance that is not clearly labeled or identified!

3.4 Definition of Chemical Waste

A variety of solid and liquid wastes can be generated in the laboratory. All lab workers that work with chemicals are required to understand how to safely handle, store, and dispose of these materials.

Once you determine a material:

- cannot be reused,
- cannot be used for its intended purpose,
- has exceeded its shelf life,
- has no known owner or generator,
- is no longer wanted or needed, or
- is an end product of a process or experiment that cannot be used as feedstock in an existing process, IT IS A WASTE!

Please remember that maintenance fluids must, in most cases, be disposed of as waste.

4. Physical safety symbols

	<p>Symbol for Gloves Gloves must be worn while working in the laboratory. It is important to choose the appropriate type of glove.</p>
	<p>Symbol for Boots Closed toe shoe that cover the entire feet must be worn all time while working in the laboratory.</p>
	<p>Symbol for Protective Clothing Apron must be worn while working in the laboratory.</p>
	<p>Symbol for Safety Glasses Safety glass must be worn while working with chemicals.</p>
	<p>Symbol for Breathing Masks Use breathing mask while working in an area with potentially contaminated air.</p>
	<p>Symbol for Face shields Face shields must be worn when executing experiments that carry the potential of causing an explosion inside of the hood.</p>
	<p>Symbol for Hearing Protection There is a wide variety of hearing protection devices available. Use one according to your need in the laboratory</p>
	<p>Symbol for Wash Hands Hand washing is a primary safeguard against inadvertent exposure to toxic chemicals or biological agents. The wash hands safety sign lets lab personnel know to wash their hands.</p>
	<p>Symbol for Food & Drink Prohibited No food and drink is allowed inside the laboratory. Especially during class hours.</p>

	<p>Symbol for Fire Extinguisher it's important that every lab be prepared with the correct fire extinguisher, inspection requirements, and training.</p>
	<p>Symbol for No Open Flames Open flame devices carry with them the risk of unintentional fire and serious consequences when not used appropriately. So be careful about open flame.</p>
	<p>Symbol for Poison/Toxic Material The toxic material symbol indicates the presence of substances that may harm an individual if they enter the body.</p>
	<p>Symbol for Explosive Hazard The exploding bomb symbol will appear on chemicals in the lab that have explosive properties</p>
	<p>Symbol for Flammable & Combustible Substances The flammable and combustible symbol signifies substances that will ignite and continue to burn in air.</p>
	<p>Symbol for recycling storage The recycling sign is used in labs to indicate where recyclable items are gathered and sorted.</p>

Some tools and machines:

Glass Rod

Conical Flask

Titration Equipment Set

Digital Balance

Some tools and machines:

Bunsen Burner

Bulb Pipettes

Dropper

Pipette Filler
